GIVE CONSIDERATION TO EYE

Is One of the Most Wonderful and Delicate Organs of the Wonderful Human Body.

More people are wearing glasses today than ever before. But that is no reason, says the Journal of the American Medical Association, for the inference that eyes are any more defective now than they were fifty years ago. It means simply that the work of today is more exacting on the eyes than the work of the earlier time, and that people are taking advantage of the increased knowledge of the structure of the eye and the means of making it serviceable. It has been discovered how the task of the person whose capital is his eyes may be more easily performed. Electricity has turned night into day and made it possible for the eye to work longer. Lenses correct the defects of the eye, and by lightening the burden, make the organ equal to the opportunity.

The eyes of civilization are no more defective than those of people living in primitive conditions, and those of men are not inferior in structure to those of animals. The chief difference is that civilized man has found the means of remedying the defects and is employing it, thus adding to his own efficiency. But this is not wholly true. There are still persons whose pride in the excellence of their sight is refusing them the aid they need for comfort and efficiency. There also are persons who abuse their eyes by guessing at the correction needed, instead of employing the accurate knowledge they may have. The eye is one of the most wonderful and delicate organs of the wonderful human body. It is certainly entitled to as much consideration as one gives his watch.

Public Opinion in Russia.

Persigny once said to Napoleon III: "You can do almost anything with bayonets except sit on them." So you can do almost anything with public opinion in Russia except wholly suppress it by sitting on it.—George Kennan in the Outlook.

NEW YORK GIRL, ROBBED

Handbag Stolen From Car
While In a Store.

Wearing apparel and jewelry to the value of \$1,000 were stolen from Miss E. M. Rogers, of Jamestown, N. Y., a few hours after her arrival in Louisville Monday afternoon. She is a guest of Miss Mary Doherty, daughter of Dr. W. B. Doherty, 1358 South First street.

Miss Doherty and a visitor, Miss Elizabeth Kell, of Shepherdsville, Ky., met Miss Rogers at the Tenth-street station with an electric car and drove to Fourth street. Miss Rogers left her handbag in the car, standing in front of the store of the John C. Lewis Company. The theft was discovered at 4:30 o'clock. Dr. Doherty was promptly notified and accompanied his daughter and two visitors to police headquarters where a report was made to the officers.

In addition to the clothes the stolen bag contained three bracelets, several rings, three la valliers, two small gold chains, a large gold chain and \$10.

Conscience Fund.

Ten thousand dollars in currency, the second largest contribution to the "conscience fund" ever received by the government, arrived at the Treasury Department Tuesday in a plain envelope, mailed Monday at New York, accompanied by an unsigned letter saying: "The sender has paid double to the United States the amount he stole and still conscience is not notified. Here is another payment." Offered placed it with \$500,000 more which has accumulated in the Treasury vaults from conscience-stricken folk who have sent sums ranging from one cent to \$18,669.

Origin of the Organ.

The origin of the organ is lost in the night of the past. It is generally supposed that the organ, in its simplest state, was a modification of the "Pipes of Pan," or simple hollow reeds of various lengths bound together and so arranged as to be rapidly swept over by the mouth of the player, each pipe graduated as near as might be to some natural "note" of music.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever, nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

BETWEEN STANLEY
AND MCCHESNEY.

W. B. Sullivan, Sheriff of Graves county, spent yesterday in Louisville, on his return from Lexington, where he went to commit a prisoner in the School of Reform. While in Lexington Sheriff Sullivan visited the campaign headquarters of Henry M. Bosworth and all the time in charge that while he had favored the nomination of Mr. Bosworth for Governor, he had come to the conclusion that the race was between Stanley and McChesney, and that this being the case he did not feel that it was any use to support Bosworth any longer, and he declared himself for Stanley. Sheriff Sullivan says that the voters are seriously considering only Stanley and McChesney and that a vote for any other is thrown away. He says the tide in Western Kentucky has set in strongly to Stanley.—Times.
